Convert ft³/min to m³/sec

Cubic meter/second ↔ Cubic foot/minute Conversion 1 m³/s = 2118.880003 ft³/min; 1 ft³/min = 0.000472 m³/s Cubic meter/second ↔ Cubic foot/minute Conversion in Batch » Cubic meter/second Conversions: » Cubic foot/minute Conversions: » Complete Flow Unit Conversions Converting cubic foot per minute to cubic meters per second value in the flow rate units scale. TOGGLE : from cubic meters per second into cubic feet per minute in the other way around. CONVERT : between other flow rate measuring units - complete list. How many cubic meters per second are in 1 cubic foot per minute? The answer is: 1 cu ft/min equals 0.00047 m³/sec 0.00047 m³/sec is converted to 1 of what? The cubic meters per second unit number 0.00047 m³/sec converts to 1 cu ft/min, one cubic foot per minute. It is the EQUAL flow rate value of 1 cubic foot per minute but in the cubic meters per second flow rate unit alternative. cu ft/min/m³/sec flow rate conversion result FromSymbolEqualsResultSymbol 1 cu ft/min = 0.00047 m³/sec Conversion chart - cubic feet per minute to cubic meters per second 1 cubic foot per minute to cubic meters per second = 0.00047 m³/sec 2 cubic feet per minute to cubic meters per second = 0.00094 m³/sec 3 cubic feet per minute to cubic meters per second = 0.0014 m³/sec 4 cubic feet per minute to cubic meters per second = 0.0019 m³/sec 5 cubic feet per minute to cubic meters per second = 0.0024 m³/sec 6 cubic feet per minute to cubic meters per second = 0.0028 m³/sec 7 cubic feet per minute to cubic meters per second = 0.0033 m³/sec 8 cubic feet per minute to cubic meters per second = 0.0038 m³/sec 9 cubic feet per minute to cubic meters per second = 0.0042 m³/sec 10 cubic feet per minute to cubic meters per second = 0.0047 m³/sec 11 cubic feet per minute to cubic meters per second = 0.0052 m³/sec 12 cubic feet per minute to cubic meters per second = 0.0057 m³/sec 13 cubic feet per minute to cubic meters per second = 0.0061 m³/sec 14 cubic feet per minute to cubic meters per second = 0.0066 m³/sec 15 cubic feet per minute to cubic meters per second = 0.0071 m³/sec Category: main menu • flow rate menu • Cubic feet per minute Convert flow rate of cubic foot per minute (cu ft/min) and cubic meters per second (m³/sec) units in reverse from cubic meters per second into cubic feet per minute. Flow rate. Gas & Liquids. This unit-to-unit calculator is based on conversion for one pair of two flow rate units. For a whole set of multiple units for volume and mass flow on one page, try the Multi-Unit converter tool which has built in all flowing rate unit-variations. Page with flow rate by mass unit pairs exchange. First unit: cubic foot per minute (cu ft/min) is used for measuring flow rate. Second: cubic meter per second (m³/sec) is unit of flow rate. QUESTION: 15 cu ft/min = ? m³/sec ANSWER: 15 cu ft/min = 0.0071 m³/sec Abbreviation, or prefix, for cubic foot per minute is: cu ft/min Abbreviation for cubic meter per second is: m³/sec Other applications for this flow rate calculator ... With the above mentioned two-units calculating service it provides, this flow rate converter proved to be useful also as a teaching tool: 1. in practicing cubic feet per minute and cubic meters per second (cu ft/min vs. m³/sec) measures exchange, 2. for conversion factors between unit pairs, 3. work with flow rate's values and properties. Deactivate the ad-blocker or wait 30 seconds for the result. Be a supporter of CalculatePlus! Try out the inverse calculation m³/s to ft³/min.
